

New Release

# iBase

[i2group.com/solutions](http://i2group.com/solutions)

## Setting the standard for collaborative analysis. Now faster, smarter and more secure.

i2® iBase is the industry leading database analysis tool trusted by thousands worldwide to combat crime, fraud and threats.

### Highlights

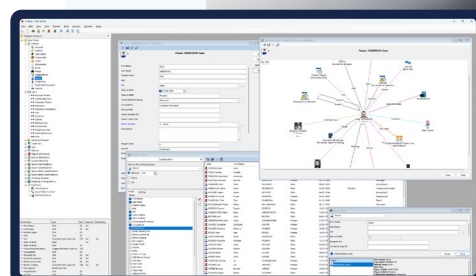

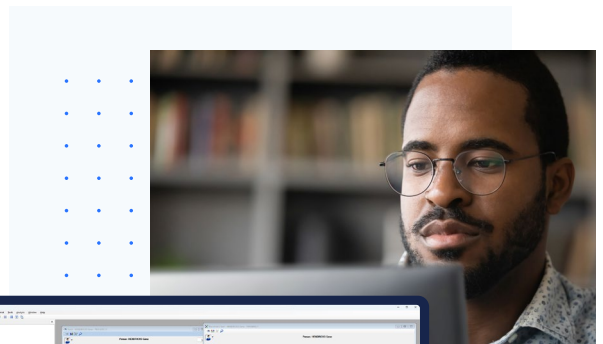

- Manage and manipulate big data more easily by consolidating into one repository
- Discover hidden connections across structured and unstructured data with visual analysis tools
- Perform powerful analysis and mapping by integrating with i2 Analyst's Notebook®
- Collaborate and share knowledge with other analysts

Designed with input from real-world scenarios, iBase provides rich analysis and visualization capabilities to help identify cohesive networks, patterns and trends, together with dissemination tools to support faster and more informed decision making.

Analysts can maximise the value of stored information through integration with i2® Analyst's Notebook®, which offers advanced analysis tools for multi-dimensional analysis.

By identifying connections within complex structured and unstructured data sets iBase empowers analysts in national security, law enforcement, military intelligence and commercial organizations to work smarter and faster than ever before.

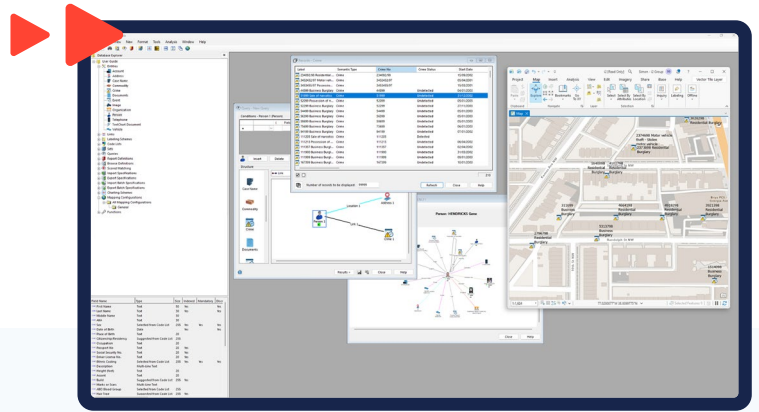

iBase provides connectivity to leading Geographical Information Systems (GIS) through the integrated iBase Geographical Information System Interfaces and stores data in a single repository, accessible by analysis from separate teams.

## Product Summary

# iBase

More than just a database.

### Flexible Data Acquisition and Management

Map and manipulate information imported from structured and unstructured data sources into a centralized, common format repository. Users can identify duplication and commonality across previously unrelated sources. Now with more flexible tools to save and run import specifications and amend fields plus auto detection of delimiters.

### Automated and Task-driven Analysis

Analytical tools to uncover hidden connections and deliver actionable results faster. Securely interrogate records, charts and documents through 'The Search 360' search bar. Perform focused question-based queries without the need to learn complicated code.

### Easy Collaboration, Workflow and Reporting

Built-in collaboration tools such as folder objects, database sub-setting and user alerts help improve operational efficiency. Whilst access levels,

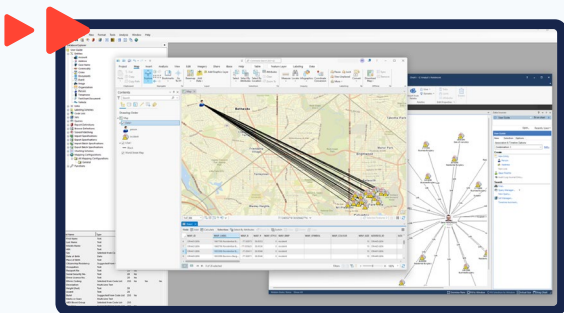

accountability and traceability features promote user and data governance. Reports are generated as PDF files for ease of sharing and data can be exported in Excel without the installation of additional software.

### Configurable Off-the-shelf Application

Cost-effective deployment with a flexible and configurable data model and security layer that can be based upon either Microsoft® Access or Microsoft® SQL Server technologies. Users with little technical expertise can create and manage a schema dependant on their organization's needs through an intuitive designer interface.

### i2 Analyst's Notebook® Integration

Leverage integration with Analyst's Notebook for data entry, searching, browsing, and results dissemination through visual charts. iBase offers the ability to store Analyst's Notebook charts, allowing individual chart items to be searched and retrieved for further analysis.

Users with little technical expertise can create and manage a schema dependant on their organization's needs through an intuitive designer interface
