Overview

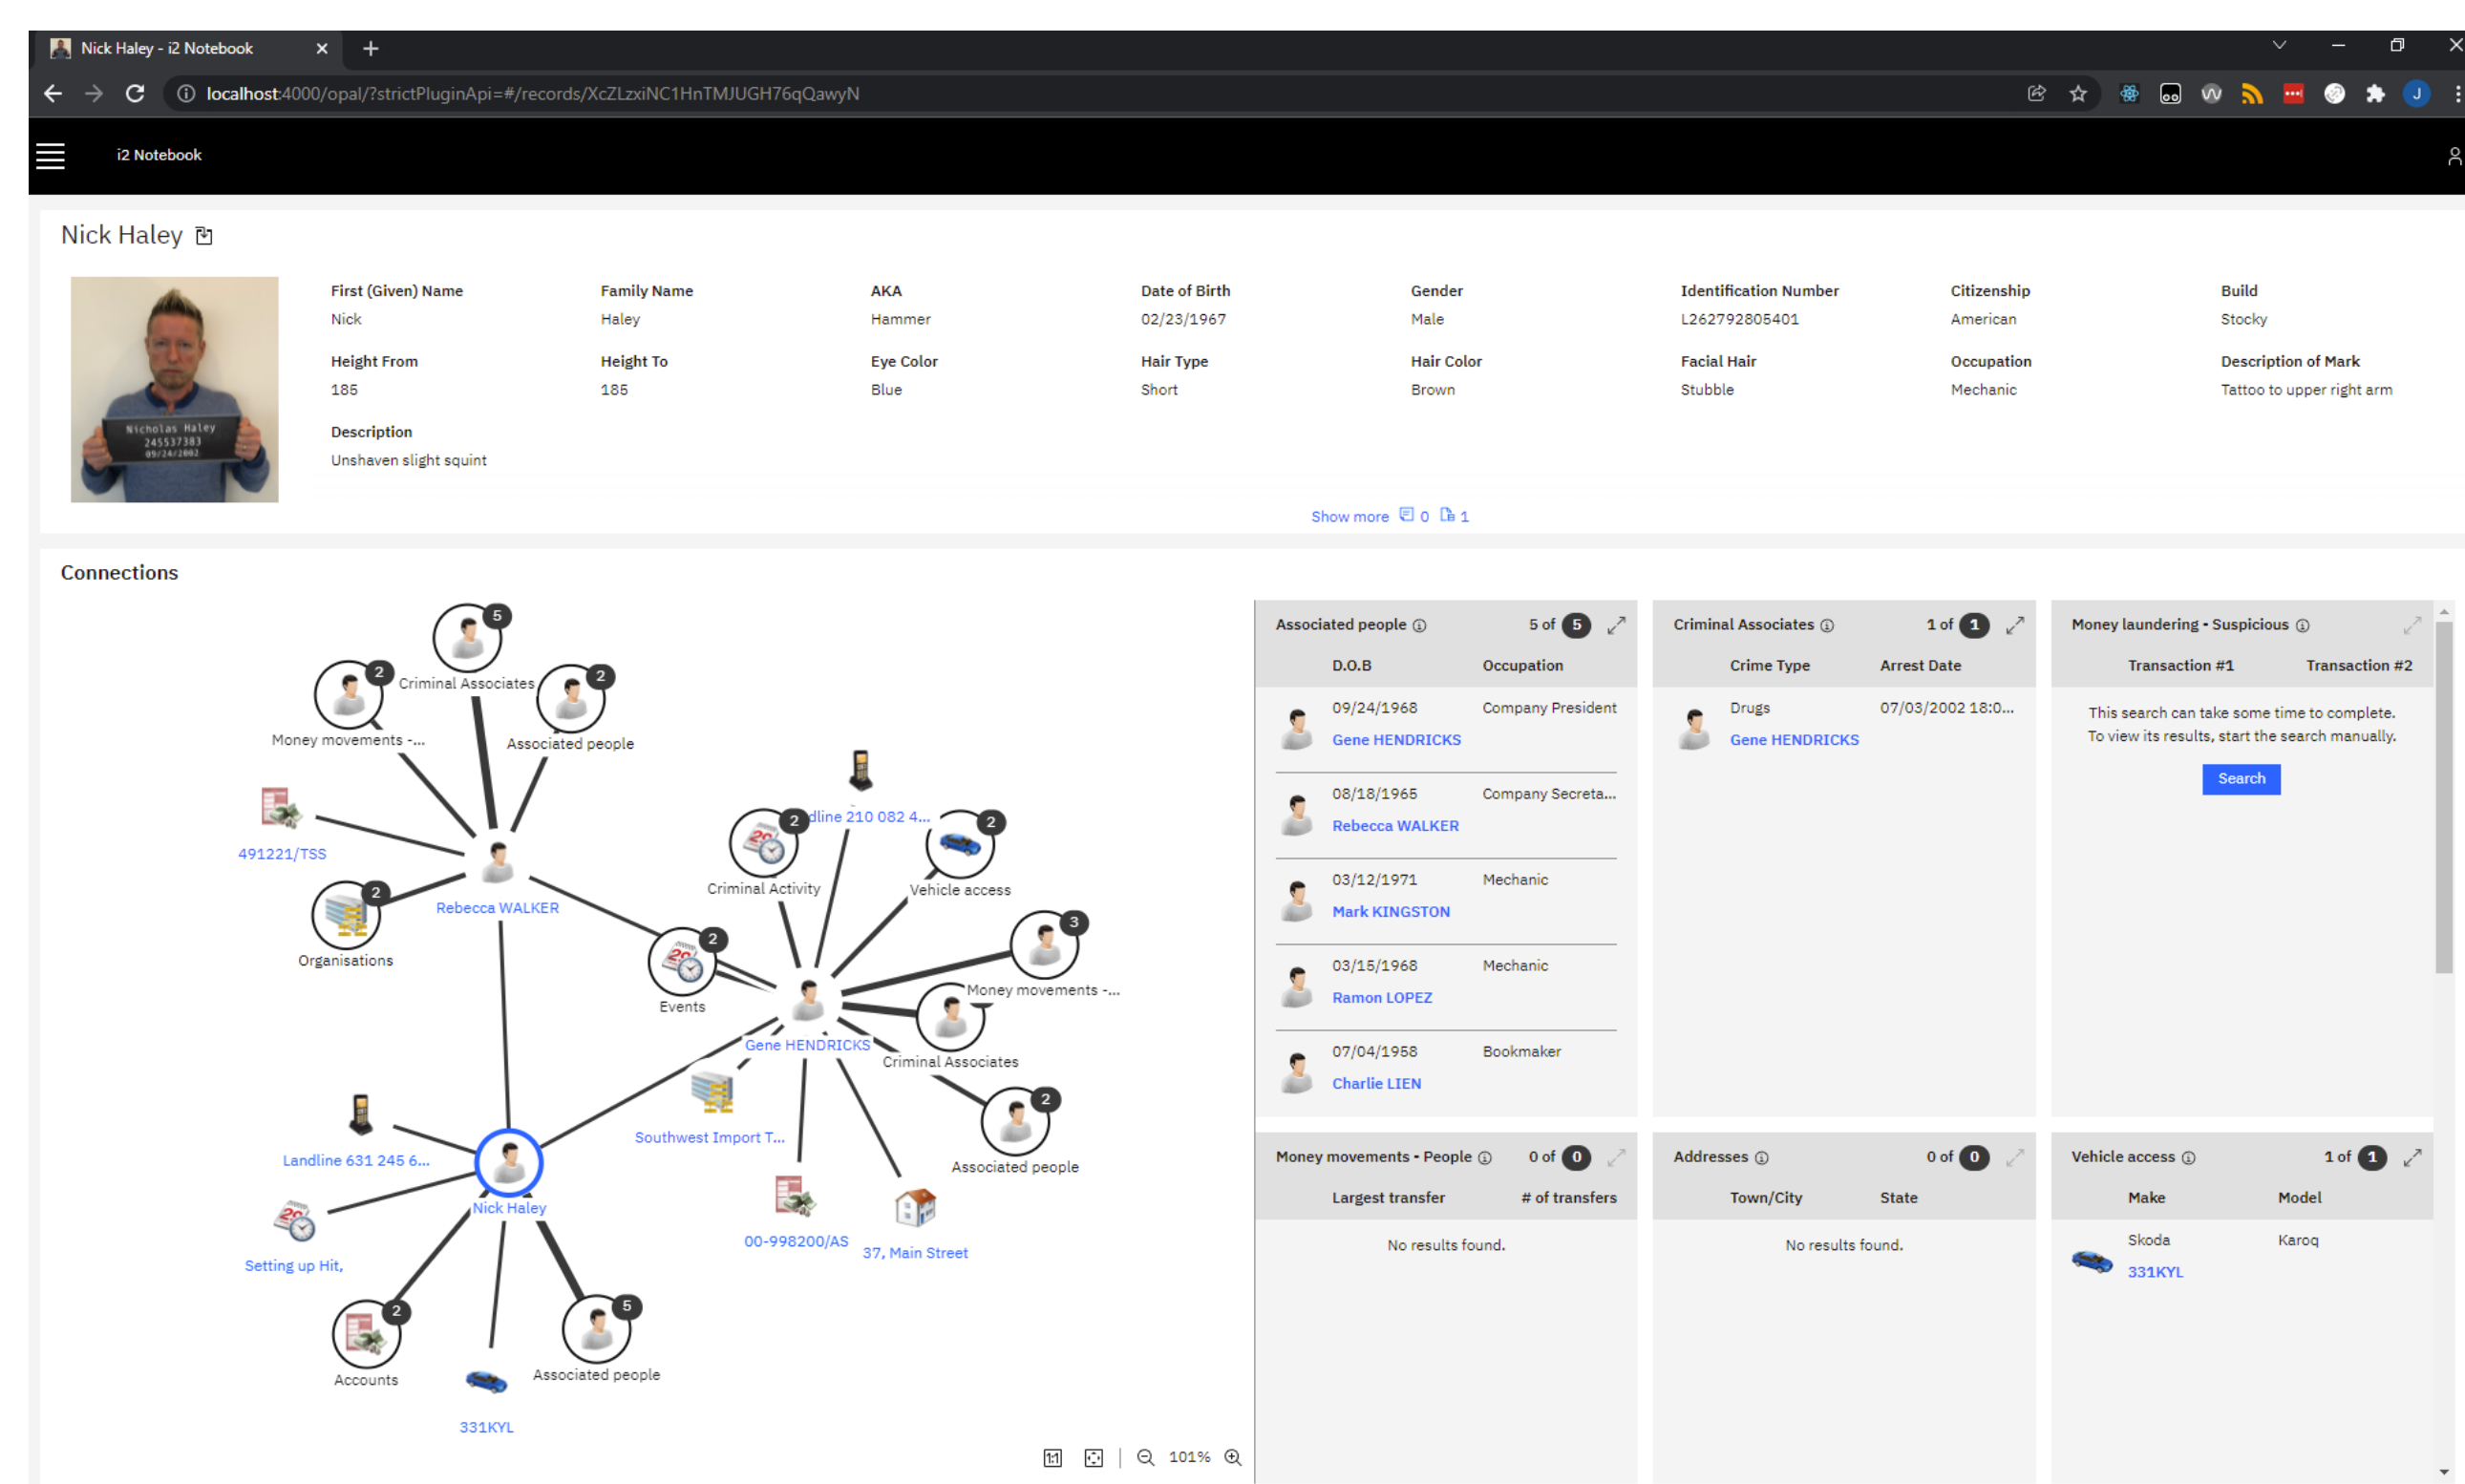

i2 Professional Services provide technical and domain subject matter experts that can assist you at any point in your intelligence analysis journey. Our experienced consultants will, help you deploy, configure, and customize i2 software to meet the specific needs of your organization and maximize the value of your i2 products.

i2's flexible and customizable products are designed to interface with a wide variety of systems and accommodate immense quantities of disparate data. By utilizing Professional Services, you will receive a design and configuration that aligns to your tactical and strategic needs. We prioritize minimizing re-work, enabling flexibility, and accommodating change.

Our team can help you to maximize the value of your investment in i2 software and improve the efficiency of your analysts by enhancing the core products to meet your needs. The Professional Services team works closely with our customers, directly or alongside business partners, to understand workflow, infrastructure, and system requirements, and provide a fast and effective implementation.

What our customers say

“i2's work was invaluable to our deployment of iBase. The consultant's combination of subject matter expertise and understanding of our requirements resulted in an implementation that exploits hidden intelligence in our database while overcoming many of the data quality issues caused by our current processes and legacy systems.”
Senior Police Intelligence Analyst

Adopt

Working directly with you, or alongside a business partner, we can create bespoke software implementation strategies, architecture and design, installation, configuration, and training to deliver on your requirements.

Using proven practices, our consultants deploy a foundation for growth and stability and ensure that sponsor, stakeholder, and end-user readiness and knowledge is achieved.

Expand

We align the implementation with organizational strategies, use cases, and existing integrations. Using assets and tried and tested integration patterns, our consultants provide subject matter expertise, gained from their vast experience and product knowledge, to accelerate the deployment of solutions and drive a successful outcome.

Optimize

We build system maturity through the development of automated analytics, collaboration strategies, advanced training, and on-going support processes. Our consultants can also work with strategic partners to achieve industry-leading solutions to meet current and future needs

Highlights

With a world-wide team of highly trained professionals, the i2 Professional Services team can help build your solution with confidence while assuring that your business needs and expectations are met.

Our experts are ready to assist your organization:

- Establishing project goals and expectations
- Maximizing the return on your investment
